Documents required for pet's transportation.

1. You must bring you're an original and a copy of an up-to-date vaccination card. All pets which receive anti-rabies vaccination for the first time they should be vaccinated at least thirty (30) days prior to the date of the flight.
 - a. Pets over fifteen (15) months or more should have listed previous anti-rabies vaccination (initial and reinforcement applied). The vaccination card should consider the application of the vaccine and/or its reinforcement at least with a one (1) year prior to the date of the flight. With this registry it will not be necessary to apply the vaccine thirty (30) days prior to the flight date.
 - b. Up-to-date anti-parasitic not older than six (6) months, taking into consideration the date of the return flight.
 - c. The vaccination card should be emitted by a licensed veterinary on paper with a letterhead and containing the veterinaries license number.
2. An original and a copy of the Health Certificate, which states that your pet has been inspected and is found clinically healthy. It should be issued by a veterinarian on letterhead and with the license number duly signed and / or stamped,

dated less than 5 days from the initial date of the trip. In the event that the return is later than 5 days from the issuance of the certificate, another must be submitted complying with the validity term.

3. Sign the pet transportation form that will be provided in the airline's counters at the airport.
4. An original and a copy of the export zoosanitary certificate issued by SAGARPA/SENASICA, in the case of flights from Mexico and to Central America.
5. If you fly from the USA, health certificate of the pet is not necessary. Upon your arrival, personnel of SENASICA will perform a physical inspection of your pet.
6. In the case of customers in Mexico with the Frequent Traveler Pet program, you are only required to carry a valid Entry Register form emitted by SENASICA.

Of service animals.

Service animals may be transported at no cost according to the conditions established above, provided they meet the specific purposes of service, being the passenger responsible for their care and management. The vaccination and health certificates must be presented with the aforementioned characteristics, as well as those corresponding to the purposes of service.

Pets on board (transported in passenger cabin).

- It must be in an approved container for air transport, fully enclosed and measuring a maximum of 44 cm in length, 30 cm in width and 19 cm in height (17.5 x 12 x 7.5 inches).
- The pet must be able to stand and move inside the cage or container.
- In case the pet is a dog, the cage may be soft (cloth) or rigid (plastic) as long as it complies with the measures and requirements specified above.
- In case the pet is a cat, the cage must be rigid (plastic) and comply with the specified measures and requirements.
- The cage should go under the seat or in front of the owner. It must be insured at the time of boarding by means of a plastic strap that will be provided at the airport. Your pet can not leave its cage during the flight for any reason.
- The owner cannot travel with the pet in emergency exit seats and must go in the window seats.
- In case the pet transported is a cat, the passenger and his pet should travel in the last row of the aircraft in a window seat.
- The owner of the pet must carry the necessary documents to transport it on domestic and international flights and must sign the pet transport form provided.
- The corresponding charge for the pet service on board must be covered.
- The passenger is responsible for the care, feeding and handling of the pet.

Of the Documented Pets

- The pet and the cage should not weigh more than 45 kg (100 lb) together.
- The cage must be of a rigid structure.
- It must be waterproof, well ventilated on all four sides and free of objects that could harm the pet.
- Must be scratch proof and with anti-leak closure.
- Must have handles to lift it.
- In case the cage measures more than 158 linear cm, a charge for oversize must be covered, in addition to the charge established for the transport of the pet.
- The pet should be able to turn freely on its own axis inside the cage.
- The cage must be labeled with the passenger's contact information and identification of the pet.
- The cage must have an aroma neutralizer. An absorbent material or sanitary stones can be placed in it.
- Food and water for pets (provided by the passenger), necessary for the journey, can be placed in the cage in spill-proof containers. Receptacles should avoid spills and the cage should contain absorbent material.

Pet documentation.

- Must be done with the same anticipation indicated to document baggage in flight.
- You must provide the required documents to the customer service adviser.

- You must fill out the pet transportation form that will be provided to you at the airport.
- You must make the corresponding payment for the pet service on board.
- Allow the staff to make a review in order to verify compliance with the transport conditions of your pet.
